

GLACIER ANTIFREEZE

Concentrated Fluid

GLACIER ANTIFREEZE is a silicate, amine-, nitrites- and phosphates free antifreeze concentrate providing frost and corrosion protection. For the perfect operation of water-cooled internal combustion engines.

GLACIER ANTIFREEZE may not be used undiluted in a combustion engine.

GLACIER ANTIFREEZE is based Mono Ethylene Glycol in combination with a powerful additive technology to obtain the following benefits:

- Corrosion protection, also for non-ferro metals
- Frost protection
- Boiling protection
- Seal compatibility
- Hard water stability
- Miscibility

GLACIER ANTIFREEZE meets the following performance criteria:

British Standard (BS) 6580
CUNA NC 956-16

AFNOR 15-601

ASTM D-3306

SAE J-1034

Typical Analysis

Properties	Unit	Method	Typical Value
Colour		Visual	Blue
Density @15°C	kg/m ³	ASTM D4052	1131
Refractive Index, 20°C		ASTM D1218	1.435
Equilibrium Boiling Point	°C	ASTM D1120	155
Reserve Alkalinity (pH 5.5)		ASTM D1121	3.0
pH Value		ASTM D1287	8.4
Freezing Protection 33% dilution with water	°C		-17
50% dilution with water	°C		-33
Date Issued: 19-01-2021	Supersedes: 26-06-2017	Revision Nr.: 02
